Corresponding author selects his/her affiliation details which we use to identify the authors and match them to the relevant agreement.
Corresponding author also adds the co-author affiliation details.
Author can add the Funder details. Funder can be the affiliated institute or a different one. In this case it is Milliman.
Based on the corresponding author affiliation details, the author sees the Publishing Options. Subscription option is followed by Gold OA option, and we make it clear that agreement has a discount.

If the librarian at the consortium rejects the author request in the Elsevier Platform, we also make it clear that the authors will receive a full price invoice and also have an option to change to subscription in case they have no funding.
In case of OA, author selects the CC License.
